### General Understanding

The America's Water Infrastructure Act of 2018 (AWIA) requires community water systems serving more than 3,300 people to prepare an Emergency Response Plan (ERP) – this is in addition to the Risk & Resilience Assessment (RRA) that HR Green has already completed for the City. The communities have to submit a certification to the U.S. Environmental Protection Agency (U.S. EPA) for each (RRA and ERP). In general, the AWIA considerations for the ERP include:

- Strategies and resources to improve resilience, including physical and cyber security
- Plans and procedures that can be implemented and identification of equipment that can be utilized in the event of a malevolent act or natural hazards that threaten the ability to supply safe drinking water
- Actions, procedure, and equipment to lessen the impact on public health and safety and supply of safe drinking water from a malevolent act or natural hazard
- Strategies that can be used to aid in the detection of malevolent acts or natural hazards that threaten the security of the water system
- The project will follow AWWA G440-17: *Emergency Preparedness Practices* and AWWA Manual M-19: *Emergency Planning for Water and Wastewater Utilities* to complete the Emergency Response Plan (ERP).
