(* Though not listed as part of the FFs59 plant community, these species are adapted to similar moist, shady conditions and are also valuable to pollinators.)											
(** I recommend using this similar Galium species because it has similar habitat requirements and ecological value, but without the hairs that catch on clothing.)											
(Though it's very valuable to pollinators, I do not recommend planting cow parsnip in an area where people may come in contact with it because it can cause phytophotodermatitis in some people.)											
<b>Grasses/Sedges</b>

<b>Vines</b>								
<i>Clematis virginiana</i>	virgin's bower		X	X	\$15			
<i>Parthenocissus spp.</i>	Virginia creeper							
<i>Vitis riparia</i>	wild grape							
(Since Virginia creeper and wild grape are already present in this location, there is no need to plant more.)								
<b>Shrubs</b>								
<i>Cephalanthus occidentalis</i>	buttonbush	X			\$7.50	\$13.75		
<i>Crataegus spp.</i>	hawthorns

<i>Staphylea trifolia</i>	bladdernut					\$15 OUT		
<i>Viburnum lentago</i>	nannyberry		#2 pots	\$20		\$23.45		
<i>Viburnum trilobum</i>	highbush cranberry	X			\$7.50	\$13.75	\$20	

(There is already abundant red-berried elder elsewhere in Hazelnut Park. I would not recommend adding hawthorn in an area where children play because of the thorns.)
