PROJECT SCHEDULE

The contractor's phased construction schedule is proposed as shown in the map on the last page of this newsletter. This schedule is subject to change based on weather, contractor's schedule, or other unforeseen conditions.

Phases 2 and 3 have flipped schedules! Jerrold Ave (the reconstruction area with no existing curb) will now be Phase 2 and will start in Mid-July. Prior Ave will now be Phase 3 and will start in August. This change in schedule was primarily made to maintain better access throughout the neighborhood during construction.

The following is an overview of the earlier/upcoming phases of the project.

Week of June 14

- Watermain installation in Phase 1A (east block of Glenpaul) will continue throughout the week.
- Watermain installation in Phase 1B (west block of Glenpaul) will likely start later in the week.

Week of June 21 and Late June

- Watermain installation will continue in Phase 1B.
- Water service installation will start on Glenpaul.
- Storm sewer work will begin on Glenpaul.

July

- Utility work will wrap up on Glenpaul and street work will begin including concrete curb and gutter.
- Pavement removals will occur in Phase 2 (Jerrold reconstruction area).
- Utility work will begin in Phase 2 with watermain and water service installation.

ACCESS & PARKING

The construction process results in a great product at its completion, but can test one's patience along its course. While the negatives of construction are in many ways unavoidable, the City aims to reduce the burden through working with the City's contractor to minimize disruption, routine mailings and other communication, and on-site assistance for residents.

When the street and utilities are under construction, the contractor will need all of the space in the street possible. Therefore, parking will not be allowed on the project area streets under construction during the working hours. Access to driveways will be provided as much as possible. Temporary access restrictions should be anticipated during the work day. The project team understands the need for access to each property, therefore the streets will be temporarily restored at the end of each work day and access to private driveways will generally be available each night.

During street & utility reconstruction, access conditions are usually most challenging after rainfall. Heavy traffic over muddy streets makes conditions worse. Residents will be encouraged to drive on paved roadways whenever that alternative exists.

Typical working hours for the project will be 7 a.m. to 7 p.m., Monday through Friday, and some Saturdays if necessary. No work is allowed on Sundays or holidays.

Trash & Recycling service will continue throughout the duration of the project on your normally scheduled service day. Please place your bins at the end of your driveway like normal, as early as possible or the night before your scheduled pickup day. Trash & Recycling pickup may be earlier than normal to complete the pickup before construction starts if possible. The Contractor may also move your bins to an accessible location at the end of the block if the garbage truck cannot access your property for any reason. Bins will then be returned to your property by the end of the day.

Mail service will also continue throughout the project. Temporary mailboxes will be set up in the neighborhood as necessary to allow for delivery if your normal mailbox is not accessible during construction. Residents will be notified when temporary mailboxes will be required and where they will be located. Temporary mailboxes for Glenpaul properties are currently set up on Prior Ave, between County Rd D and Glenpaul.

CONTACT AND WEBSITE INFO

Brian Schmit, of Bolton & Menk, Inc., is the Construction Observer for the project and will be the main point of contact for residents during construction. He can be reached at **(612)-368-1228** or brian.schmit@bolton-menk.com

Nick Amatuccio, of Bolton & Menk, Inc., is the Project Engineer overseeing the construction process and will serve as one of the main resident contacts. He can be reached at **(612)-965-3926** or nickam@bolton-menk.com

David Swearingen is the Interim Public Works Director for the City of Arden Hills and will be the main contact at the City for this project. He can be reached at **(651) 792-7847** or dswearingen@cityofardenhills.org

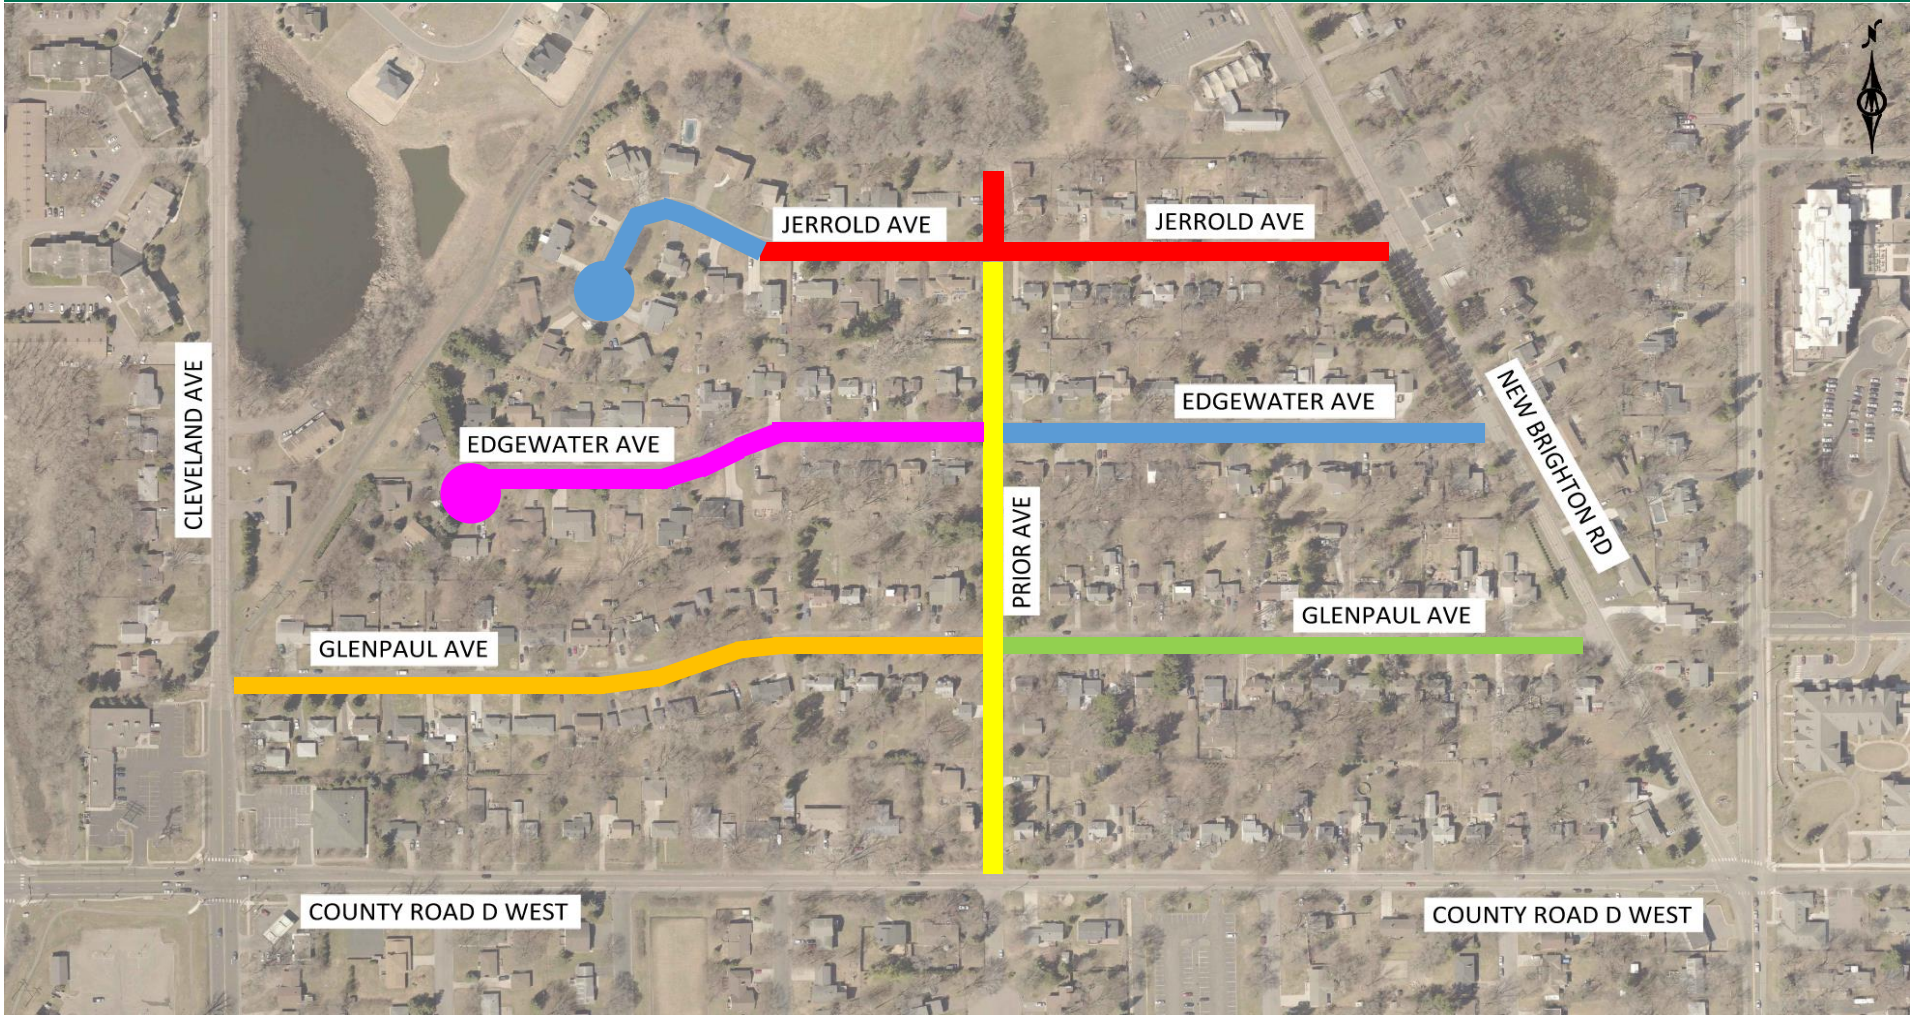

Website: The website will be updated approximately weekly once construction starts with the latest project info throughout construction. Residents can sign up for text and email updates on the website. The site URL is <https://www.cityofardenhills.org/1007/2021-PMP-Street-and-Utility-Improvements>

SAFETY

The contractor will do everything they can to make the project area safe for residents. However, residents should be aware of their surroundings when walking or driving near construction equipment. The City asks that residents keep their distance from construction equipment in use and utility trenches. There are also materials that can cause harm if caution is not used such as hot asphalt pavement immediately after being placed. Please keep children and pets away from construction activity and open trenches as they might not be aware of the dangers. If you see anything that you feel is unsafe, please do not hesitate to call **Brian Schmit**.
