PROJECT SCHEDULE

The following is an overview of the upcoming phases of the project:

Late September/Early October

- Sod placement is completed on Glenpaul Ave.
- Sod placement will wrap up on Jerrold Ave and Prior Ave.
- Restoration behind spot curb replacements will wrap up on Edgewater Ave.
- Please pay attention to the Sod Care Notice left at your door if you received sod at your property.

Week of October 11th

- The final layer of asphalt will be paved on all phases, scheduled for October 13th & 14th, weather permitting. Access will generally be maintained during paving but there may be brief (5 to 10 minutes) delays to traffic during the paving operations. Please keep your speed low and avoid harsh turning motions if you need to drive over the freshly paved asphalt before it is rolled.

Later in October

- Final clean up and punch list work to occur through the month of October.
- Sod will be watered by the contractor until the warranty end date on the notice received.

SAFETY

The contractor will do everything they can to make the project area safe for residents. However, residents should be aware of their surroundings when walking or driving near construction equipment. The City asks that residents keep their distance from construction equipment in use and utility trenches. There are also materials that can cause harm if caution is not used such as hot asphalt pavement immediately after being placed. Please keep children and pets away from construction activity and open trenches as they might not be aware of the dangers. If you see anything that you feel is unsafe, please do not hesitate to call **Brian Schmit**.
